Project Title: Kakao Website

I want to create a website about the Kakao internet company. I want the website to be a multi-page website so I can include the brief history and introduce some of current subsidiaries of Kakao.

- Home Page: A brief introduction of the company
- History: A brief history about the company
- Kakao: Kakao is the 'mobile life platform' company. The flagship services are KakaoTalk, Melon, and Daum.
- Kakao Games: Kakao Game is a game industry that publishes and develops mainly the mobile games. In recent years, Kakao Games has been using AR and VR technologies in their products.
- Kakao Mobility: kakaomobility is transforming mobility by improving access to various transportation service. Through a single platform, it provides taxi, chauffeur, e-bike, shuttle, navigation and parking reservation services and this platform can also be used for business or overseas trip depending on the user's purpose. Embracing future technologies such as AI and Autonomous driving is one of the major tasks of kakaomobility as it aims to provide more opportunities to people by innovating the future mobility.
- Kakao Bank: Kakao Bank has opened a new banking system for the users. With its simple mobile banking account, Kakao Bank users can easily receive and send money on their phone and also through the KakaoTalk messenger. Kakao Bank allows users to connect with pre-existing accounts and frequently collaborates with other banks or credit card companies.
